

CONTENT TAXONOMY
v2.0

Tier 1 – Tier 2 Categories

Introduction

The Taxonomy and Mapping Work Group assembled in April 2016 to identify industry taxonomies in need of updating for companies interested in expanded categorization of content, advertising products, and audience segmentation. The IAB Tech Lab Content Taxonomy, previously known as the QAG Taxonomy, was developed in consultation with taxonomy experts, measurement companies, and members of the IAB Technology Laboratory in order to develop a standard content taxonomy. This taxonomy will be leveraged by publishers & advertisers for describing the topics of page content and site content with the primary purpose of facilitating relevant, brand safe and effective advertising. The taxonomy also serves secondary purposes of audience analysis and development. This document is a summarization of Tier 1 and Tier 2 categories, released in January of 2017; this is the culmination of the working group efforts and can be found at: <https://iabtechlab.com/content-taxonomy/>

About the IAB Technology Lab

The IAB Technology Laboratory is a nonprofit research and development consortium charged with producing and helping companies implement global industry technical standards and solutions. The goal of the Tech Lab is to reduce friction associated with the digital advertising and marketing supply chain while contributing to the safe growth of an industry. The IAB Tech Lab spearheads the development of technical standards, creates and maintains a code library to assist in rapid, cost-effective implementation of IAB standards, and establishes a test platform for companies to evaluate the compatibility of their technology solutions with IAB standards, which for 18 years have been the foundation for interoperability and profitable growth in the digital advertising supply chain. The Taxonomy and Mapping Work Group is a working group within the IAB Technology Lab. Further details about the IAB Technology Lab can be found at: <https://iabtechlab.com/>
